

About:

I'm deeply curious about science, technology, robotics, data analytics, deep learning, and design. I am dedicated to building dynamic high tech environments that make use of my current skills while helping me cultivate new ones. I enjoy learning about and using new technologies such as programming languages, hardware, and various types of software. I have a passion for Open Source software especially Unix based operating systems, virtualization software, and open source programming languages such Python and Java.

Education:

California State University Sacramento **Graduated Spring 2014**

Bachelor of Science Degree in Computer Science.
